Mobile Setup

This quick start guide will help you configure your outdoor camera for initial use. Complete this section before performing any permanent installation and mounting.

Before you begin:

- Make sure that you have a strong WiFi connection at the location of your camera.
- Make sure you know the SSID (WiFi network name) and password of the 2.4GHz WPA-PSK/WPA2-PSK WiFi network that you want your camera to connect to. Your network cannot be hidden.
- Make sure your network has at least 2Mbps upload speed for each camera when live viewing or 4Mbps upload speed for each camera when using the meShare Cloud Service.
- Download and install the “meShare” app from Google Play™ or the App Store™ (compatibility: iOS® 7.0+ or Android™ 4.0+). Launch the app and sign up for a free meShare account. All of your devices will be bound to this account.
- Plug in and power on the camera near your router for initial setup. Fasten the antenna onto the camera.
1 Log in and press the Add Device option in the upper right corner of the Home Page.

2 Power on your device. The status light will blink green when the device has powered on. Tap "Start installation" to proceed.

3 Scan this QR code shown below when prompted by the app.
Turn up the volume on your phone to hear voice prompts during the mobile setup process. Tap "Next" to proceed.

Connect your phone to the 2.4GHz WPA-PSK/WPA2-PSK WiFi network that you want your device to connect to (network cannot be hidden). Tap "Next" to proceed.

Enter the password of the WiFi network that you want your device to connect to. Please make sure that your WiFi password is correct. Tap “Next” to proceed.

Note: The WiFi password is case-sensitive.
Steadily hold your phone's display in front of your meShare camera until you hear "Device connected". The distance between your phone and the meShare camera should be about 8 inches.

Name your device and set a password for it. Tap "Next" to proceed.

Note: The password provides an additional layer of security for your devices. You will not need to use this password when accessing your devices from the meShare app. It is not required, but it is highly recommended.

Your device has been successfully configured! Tap “Done” to finish. You can now share or view your device.
Mounting Your Cameras

Installation Requirements & Tips:

- If you’re installing your camera outdoors, all wired connections must be weatherproofed.
- Make sure that your camera is within range of your WiFi network. Make sure the network of the location where you install each camera has at least 2Mbps upload speed to view and 4Mbps upload speed when using the meShare Cloud Service.
- Before installing the camera, carefully plan where and how it will be positioned, and how you will route the wiring that connects your camera to the power adapter.
- Try to avoid WiFi signal interference from concrete, cement, and metal as much as possible. Do not place your camera in a location where these materials stand between your camera and your WiFi router.
- If there are many obstacles between your camera and the WiFi router, the transmission range will be greatly reduced. In order to increase the range, you may purchase a WiFi range extender to place near the camera.

Unplug the camera that has been configured in Section 1.
2 Line the camera bracket against the wall where you would like to install the camera, and mark the appropriate holes. Drill three holes slightly smaller than the wall anchors and use a hammer to gently insert the anchors into the wall. Fasten the three screws through the holes on the bracket and into the anchors as shown.

3 You will be able to adjust the camera position using the adjustable camera bracket. Position the camera for an optimal viewing angle, and tighten the bracket.
4 Connect the supplied power adapter to the power port on the camera, and plug the adapter into a nearby power outlet.
3 Recording and Viewing Options

Recording Options

This device is compatible with the meShare Cloud Service. Please visit www.meshare.com/cloud for information and articles about the meShare Cloud Service. The cloud service will allow you to:

- Record continuously and store footage on our secure cloud servers.
- Create and save video clips from your recordings.
- Access your footage and clips at any time from any location.
- Enjoy more smart features in the future!

Viewing Options

All of your meShare devices will be bound to your meShare user account. You can access your camera and other devices by using the meShare app with any Android™ or iOS® device. Just download the meShare app from Google Play™ or the App Store™.

You can also access your devices from any web browser with our web app. Visit user.meshare.com and log in with your meShare user account information.
4 Status Light Definitions

This camera has an LED ring that indicates the status of the camera. The light can be found on the outer ring of the camera lens. Please refer to the guide below:

- **Solid green**
  The camera is powering on.

- **Blinking green**
  The camera is ready for setup.

- **Blinking blue**
  The camera is connecting to the WiFi network. Please do NOT turn off or unplug the camera at this time.

- **Solid blue**
  The camera has successfully connected to the WiFi network.
5 Troubleshooting

If you were unable to connect your camera successfully:

- Make sure that you are connecting to a 2.4GHz WPA-PSK/WPA2-PSK WiFi network, and that your network is not hidden.
- Please make sure that you entered the network name and password correctly. Note: Both are case-sensitive.
- During the QR code scan, please make sure that your phone's display brightness is high, and avoid glare on your phone's display.
- Please make sure that your camera is not already bound to another user account.

Note: You can check the status light of the device to see if it has been successfully connected to the WiFi or not. If the status light is blinking green, it means that it has not connected to a WiFi network. If it is solid blue, it means that it is already connected to the WiFi network.
Support

Having difficulty?

You can use the Live Chat function in the meShare app if you have any technical problems. Please follow the steps below:
Access the “Me” page in the lower right corner in meShare app and select "meShare Support".
